8K Purpose, Organization and Governance

8K.1 Mission Statement

The Radiologic BSRS Science program of Holy Family University is committed to the formation of integrated persons who possess knowledge and awareness of their responsibilities to God, humanity, and self. The program seeks to cultivate professional competence in graduates that are actively responsible in societal service to a diverse human family. The program is designed to endow the radiologic health team with leaders, educators, administrators and post-primary imaging specialists committed to the service of mankind.

8K.1.1 Goals of the BSRS Radiologic Science Program

The Bachelor of Science in Radiologic Science (BSRS) program offers degree completion on a part or full-time basis. The curricula tracks are designed to prepare students for advanced post-primary clinical practice as Computed Tomography (CT), Magnetic Resonance (MR) and Vascular Interventional (VI) technologists. The general track promotes professional development for leadership, research and education positions. The goals of the program are as follows:

8K.1.1.1 Program Goals

1. Provide a curriculum for post-primary practice in radiologic science.
2. Develop critical thinking and problem-solving skills necessary for independent and supervisory functions in radiologic science.
3. Develop student behaviors that promote continual professional development.

8K.1.1.2 Program Outcome Objectives

Upon graduation from Holy Family University’s BSRS program, the student will:

1. Synthesize knowledge and skills utilized for specialized practice in radiologic positions.
2. Refine communication skills required for competent clinical practice.
3. Evaluate problem solving and critical thinking skills required for competent clinical practice.
4. Integrate behaviors that promote professional growth and development.
5. Analyze issues that influence health care needs of diverse populations.
6. Apply technological literacy, competency and systems-oriented protocols through interaction with the technological world.

8K.1.2 Enabling Activities

The goals in Section 8K.1.1.1 will be carried out by the following actions:
1. Students will expand technical, intellectual, information literacy/presentation and social skills through active participation in the organized sequencing of classroom and clinical education experiences provided in the curricula;

2. Students will develop technical proficiency that improves Radiologic Science health services and advances career fulfillment through expanded clinical practice and theory;

3. Post-primary track students will perform clinical procedures using patient-focused, evidenced-based standards of care, effectively employing measures to control the use of electromagnetic radiations/magnetic fields for the protection of patient, self and others.

8K.1.3 Comprehensive Examination

8K.1.3.1 Policy
In accordance with university policy, a required comprehensive examination or project is a primary indicator of knowledge integration acquired through successful completion of didactic and/or clinical courses. Passing the comprehensive project is required to fulfill graduation requirements. Graduation may be delayed in the event of earning a failing grade on the comprehensive project.

8K.1.3.2 Procedure
1. The comprehensive project will be assigned during RADS-450.
2. The nature and time of the comprehensive project assignment is determined (and outlined) in the RADS-450 course syllabus.
3. Program faculty will determine a passing score on the comprehensive project.
4. Students who are not successful passing the comprehensive project on first attempt are required to meet with the RADS-450 course instructor for guidance and direction.
5. The comprehensive project must be passed to fulfill graduation requirements.

8K.1.4 Clinical Practice Examinations

8K.1.4.1 Description
Clinical practice experiences shall be designed to include sequential development, application, critical analysis, integration, synthesis and evaluation of concepts and theories in the performance of clinical experience procedures. Using structured, sequential assignments in the clinical setting, concepts of team practice, patient-centered clinical practice and professional behaviors shall be effectively communicated, demonstrated, observed and evaluated.

Clinical practice shall be designed to provide experiences in patient care and assessment, competent performance of post-primary imaging procedures and image assessment. Progressive increases in the level of student proficiency enable the student to:

1. Incorporate patient assessment and management with procedural performance and evaluation required in daily clinical practice.
2. Execute imaging procedures under appropriate levels of clinical supervision.
3. Adhere to concepts of team practice, focusing on organizational theories, team member roles and conflict resolution.
4. Adapt to varying clinical environments by rotating to a minimum of two clinical education settings.

5. Perform patient-centered care under direct or indirect supervision for all patients regardless of race, age, color, gender, religious affiliation, sexual orientation, national and ethnic origin and radiologic examination prescribed.

7. Adapt procedures/protocols to meet age-specific, disease-specific and culture-specific needs of patients.

8. Integrate the use of appropriate and effective oral, written and nonverbal communication with patients and family, the public and members of the health care team (peers, physicians, nurses, administration, etc.) into the clinical environment.

9. Demonstrate proficiency in patient assessment skills by accurately evaluating the patient’s status and condition before, during and after the imaging procedure.

10. Evaluate examination requests and correlate to patient history for accuracy and initiate verification procedure(s) as necessary.

11. Assess and document patient history prior to beginning each imaging procedure.

12. Identify and actively respond to patient adverse reactions to a contrast agent administration and follow established facility protocol in the treatment of contrast agent reactions.

13. Submit imaging procedures to PACS. Document completion of imaging procedures in patients’ records, following established facility policy.

14. Apply standard precautions during all imaging procedures in support of infection control practices.

15. Apply appropriate medical and surgical aseptic techniques while completing imaging procedures.

16. Prepare equipment and accessories (including contrast agents) as necessary to perform imaging procedures.

17. Report any equipment malfunctions to appropriate clinical personnel.

18. Demonstrate (as appropriate) the principles of radiation protection standards to include time, distance, shielding and radiation monitoring.

19. Demonstrate (as appropriate) the principles of MR safety protocols.

20. Comply with safe, ethical and legal practices pertaining to the completion of imaging procedures.

21. Adhere to the ASRT’s Scope of Practice and Practice Standards for CT, MR and VI during clinical practice.

22. Demonstrate appropriate principles of patient transferring, positioning and immobilization to effectively complete imaging procedures.

23. Comply with institutional and departmental procedures when responding to emergencies, disasters and accidents.
24. Differentiate between emergency and non-emergency imaging procedures.
25. Critique/evaluate medical images for appropriate clinical information, image quality and patient demographics.
27. Demonstrate accurate documentation and utilization of computer skills related to HIS, RIS and PACS systems.
28. Honor HIPAA compliance while completing all didactic and clinical education activities.

8K.2 Academic Policies and Procedures

8K.2.1 Admission Procedures
Individuals interested in the BSRS program may request program information from either the Holy Family University Office of Admissions or the Radiologic Science Program Office. Interested individuals should follow the application procedure as described in the University’s Undergraduate Catalog.

Once the application has been reviewed by the Admissions Office and found to meet the University’s admission requirements, including a minimum post-secondary GPA of 2.5, the candidate must document ARRT certification and be in compliance with CE requirements. The University awards 44 semester hour credits for course content mastered through successful completion of an accredited radiography curriculum and attainment of ARRT certification. The University accepts ARRT certification in radiography as validation of entry-level knowledge. Transfer credit of core course credit will be evaluated by the Academic Advising Center and approved by the Dean, School of Nursing and Allied Health Professions and Radiologic Science Program Director.

Applicants must comply with the program’s Physical/Technical Standards plus Tattoo Policy. (Refer to Appendix 8K.2.1.1: Technical Standards and Appendix 8K.2.1.2: Tattoo Policy for additional information.)

8K.2.2 Advisement and Rostering
All matriculated Radiologic Science students are initially advised by the Academic Advising Center. A Radiologic Science academic advisor will also be assigned to each student. Students’ names and assigned academic advisors are posted inside (and immediately outside) the Radiologic Science Program Office (HFH 114). Each student is expected to schedule initial rostering appointments with the Academic Advising Center (and individual academic advisors thereafter) and to actively participate in the advising process.

Once the student and academic advisor have developed a roster for the next academic semester, it is required that the student inform the advisor of any changes in course selection. Courses may be offered only during certain semesters and careful planning is critical to ensure successful completion of degree requirements. BSRS radiologic science courses may only be offered once per academic year, and must be completed in sequence (see specific BSRS track Course Sequence Sheet). Additionally, a student planning to withdraw from a course should make an appointment with the academic advisor to determine the impact of the withdrawal on program progression, full-time status and/or financial aid eligibility. Failure to officially withdraw from a
course with the Registrar’s Office can result in a student receiving a grade of F.

The advisor’s role is one of assisting the student in completing the program of study; therefore, it is important that a strong professional relationship be established between the student and academic advisor. Support of faculty advisement does not reduce the student’s responsibility for academic decisions. Final responsibility for attaining degree requirements rests solely with the student.

Students are not guaranteed that all classes and/or clinical assignments will be offered at a time of their choice. Day/evening/online classes or day/evening clinical assignments may be necessary depending on the availability of faculty and clinical education settings.

### 8K.2.3 Eligibility to Remain in the BSRS Program

Continued enrollment requires students to achieve a minimum:

- Grade of C in all radiologic science courses,
- Concentration GPA of 2.5*, and
- Cumulative GPA of 2.5*.

A student earning “<C” in any didactic concentration course is permitted to repeat this course once. This policy is permitted only one time for one course. Post-Primary degree/certificate track students earning a grade of “fail” in a clinical education course will be dismissed from the BSRS Program with no option to reapply.

*Students whose concentration and/or cumulative GPA drops below 2.5 will have one semester to increase the GPA to 2.5. Students who do not achieve a concentration/cumulative GPA of 2.5 after one additional semester will be dismissed with no option to reapply. Students who restore the concentration/cumulative 2.5 GPA after one additional semester will be permitted to continue in the BSRS program. If the student’s concentration and/or cumulative GPA falls below 2.5 in any subsequent semester, they will be academically dismissed with no option to reapply. Dismissal from the BSRS program does not constitute dismissal from the University.

Students must earn a minimum grade of D in all core and concentration-related (i.e., BIOL-207/L & 208/L, MATH-130, PHIL-205 & SOCO-310) courses to satisfy graduation requirements.

A student who is academically dismissed from the BSRS program is not eligible for readmission.

### 8K.2.4 Program Dismissal

#### 8K.2.4.1 Academic Grounds

See Section 8K.2.3 Eligibility to Remain in the BSRS Program.

#### 8K.2.4.2 Clinical Grounds/Clinical Suspension

Students must complete all clinical education courses in sequence with a minimum grade of “pass” to progress forward in the BSRS Program. Students who earn a grade of “fail” in a clinical education course are dismissed from the BSRS Program with no option to reapply.

Clinical misconduct may result in a student’s immediate clinical suspension and possible dismissal from the BSRS program. Holy Family University will not tolerate any act that violates acceptable standards of professional conduct at a clinical setting. Students are directed to review
Appendix 8K.2.4.2.1: Clinical Conduct Policy. Clinical suspension may result from any act that violates a clinical education setting’s standards of conduct, for any act that, in the opinion of faculty, places a patient and/or clinical personnel at risk.

A student may, for any of these offenses (but not limited to), be told to leave a clinical facility at any time, and must comply immediately. Any student requested to leave a clinical facility must report directly to the Radiologic Science Program Office and meet with the Clinical Coordinator (or if unavailable, another Radiologic Science faculty member) to provide their account of events leading up to their clinical suspension, and to receive procedural instructions.

A student suspended from clinical education activities may not attend clinical assignments pending a decision by faculty, typically consisting of faculty members from the School of Nursing and Allied Health Professions, including a minimum of two Radiologic Science faculty members, within one week of clinical suspension.

A decision by faculty will be determined and the Program Director will forward a written response to the student within one week of the clinical suspension. This review may result in: dismissal from the University and/or BSRS program or clinical reinstatement to the same (or different) clinical education setting (pending clinical space availability). If reinstated, the student will be responsible for all clinical course requirements and a decision regarding clinical absence(s) (and impact on course grade) will be determined at this time.

A student dismissed from the BSRS program for clinical misconduct is not eligible for program readmission.

8K.2.5 Program Readmission

Program readmission is only granted to students having elected to voluntarily stop-out of the University/BSRS program. Students seeking readmission must adhere to the following conditions:

1. Readmission is dependent upon clinical space availability.

2. Readmission will only be considered following a student’s voluntary withdrawal from the BSRS program/University. The student must have stopped-out having minimum cumulative and concentration GPAs of 2.5 to qualify. Students dismissed (or who withdraw) due to academic (or clinical) reasons are not eligible for readmission.

3. A written request must be submitted to the Radiologic Science Program Director at least one semester prior to the semester to which the student is seeking readmission, to provide sufficient time to assess and process the request.

4. Within 1 year of clinical inactivity:

   A student seeking to continue clinical progression without successfully completing a 400-level clinical education course is required to repeat all requirements of the clinical education course. The Program reserves the right to require students seeking to continue clinical progression after successfully completing the first of two 400-level clinical education courses to complete a clinical simulation prior to reestablishing clinical activities.

   After 2 years of clinical inactivity:

   The American Registry of Radiologic Technologists (ARRT) does not recognize examination procedures that are more than 24 months old. Therefore, this would
necessitate the student to repeat (independent study) any clinical education course(s) successfully completed previously.

5. Students must follow the University’s *Readmission to the University* policy described in the *Undergraduate Catalog*.

6. Compliance with this policy rests solely with the student.

### 8K.2.6 Grievance Procedure

#### 8K.2.6.1 Non-Academic Grievance

The policies and procedures set forth in this *Policy Manual* have been established as a guide for students to ensure a proper environment for academic, spiritual and social growth. It is hoped that students will respond with maturity and a strong sense of individual responsibility while completing the program’s requirements.

If any student has a grievance related to University policy and non-academic in character, the student shall refer to the University’s Grievance Policy, Non-Academic as published in the University’s *Student Handbook*.

#### 8K.2.6.2 Academic Disputes and Grade Challenges

The appeal procedure shall act as a vehicle for communication and decision-making between student and faculty and provide a process through which a grievance can be resolved. Justifiable cause for grievance shall be defined as any act that is perceived as either a prejudiced or capricious action on the part of a faculty member in the evaluation of a student’s performance or an arbitrary action or imposition of sanctions without regard for due process.

If a student has an academic grievance, the student should refer to the University’s *Undergraduate Catalog* Grievance Procedures, Academic Disputes and Grade Challenges policies.

### 8K.3 Clinical Education Experience

#### 8K.3.1 Overview of Clinical Education

Holy Family University is committed to providing a comprehensive clinical education experience essential to preparing students for post-primary certification in CT, MR or VI. The clinical curriculum is composed of two sequentially linked clinical education courses that increase in complexity and requirements. Details outlining clinical education requirements are published in individual course syllabi. Additional information pertaining to clinical policies and procedures is published in the Radiologic Science *BSRS Clinical Education Handbook*.

Compliance with *University Policy Manual Vol. VIII-K BSRS Student Handbook Radiologic Science* policies and procedures is required while participating in all clinical education assignments. Specific policies outlining the lowering of clinical grades due to policy noncompliance are described in individual clinical course syllabi.

#### 8K.3.2 Objective of Clinical Education

Students will observe, practice, and actively demonstrate professional skills required for clinical practice by:
1. Completing the required number of clinical examination procedures established for each clinical course (as defined in clinical course syllabi);

2. Integrating patient assessment and management focusing on procedural analysis, performance and evaluation required in daily clinical practice.

3. Executing imaging procedures under appropriate levels of supervision.

4. Adhering to concepts of team practice focusing on organizational theories, roles of team members and conflict resolution.

5. Adapting to varying clinical environments by rotating to a minimum of two clinical education settings.

6. Supporting patient-centered, clinically effective care for all patients regardless of age, gender, disability, special needs, ethnicity or culture.

7. Respecting patients regardless of race, age, color, gender, religious affiliation, sexual orientation, national and ethnic origin, and radiologic examination prescribed that influence patient compliance with radiologic procedures.

8. Adapting procedures/protocols to meet age-specific, disease-specific and culture-specific needs of patients.

9. Integrating the use of appropriate and effective oral, written and nonverbal communication with patients and family, the public and members of the health care team (peers, physicians, nurses, administration, etc.) into the clinical environment.

10. Demonstrating competence in patient assessment skills by accurately evaluating the patient’s status and condition before, during, and after the imaging procedure.

11. Evaluating the examination request and compare to patient history for accuracy, and initiate verification procedure as necessary.

12. Assessing and documenting patient history prior to beginning the imaging procedure.

13. Identifying and responding to patient adverse reactions to contrast agent administration and follow appropriate clinical protocol in the treatment of contrast agent reactions.

14. Documenting procedure completion in patient’s record following facility policy.

15. Applying standard precautions during all radiologic procedures in support of infection control practices.

16. Applying appropriate medical and surgical aseptic techniques while completing imaging procedures.

17. Preparing equipment and accessories (including contrast agents) as necessary to perform imaging procedures.

18. Reporting equipment malfunctions to appropriate clinical personnel.

19. Demonstrating (as appropriate) the principles of radiation protection standards to include time, distance, shielding and radiation monitoring.

20. Demonstrate (as appropriate) the principles of MR safety protocols.

21. Complying with safe, ethical and legal practices pertaining to the completion of imaging procedures.
22. Integrating the ASRT’s *Scope of Practice and Practice Standards for CT, MR and VI* into clinical practice.

23. Demonstrating principles of transferring, positioning, immobilizing and restraining of patients to effectively complete imaging procedures.

24. Complying with institutional and departmental procedures when responding to emergencies, disasters and accidents.

25. Differentiating between emergency and non-emergency imaging and follow appropriate protocols for completing these procedures.

26. Evaluating medical images for appropriate clinical information, image quality and patient demographics.

27. Evaluating medical images to determine corrective measures to improve non-diagnostic images.

28. Demonstrating accurate documentation and utilization of computer skills related to HIS, RIS and PACS systems.

29. Maintaining HIPAA compliance while completing all didactic and clinical education activities.

The student will observe, practice, and demonstrate application and synthesis of professional behaviors by:

1. Demonstrating an ability to interact with others;
2. Communicating a caring (empathetic) attitude toward patients;
3. Accepting (and applying) constructive feedback (including self-evaluation) needed to foster growth and development of appropriate affective behaviors;
4. Demonstrating effective use of time management completing clinical examination procedures systematically and efficiently;
5. Adhering to program (and clinical agency) policies and procedures;
6. Demonstrating ethical conduct, respecting the patient’s rights, values and confidentiality;
7. Demonstrating self-motivation necessary to complete clinical education requirements;
8. Demonstrating dependability and responsibility while fulfilling clinical education requirements;
9. Presenting an appearance and demeanor that communicates professionalism and competence;
10. Demonstrating interest in the profession of Radiologic Science by joining a professional organization such as PhilaSRT, and/or American Society of Radiologic Technologists (ASRT); and
11. Performing community service by attending health fairs; visiting local schools; participating in Lambda Nu Honor Society activities, monthly program Information Sessions, Campus Blood Drive and other Radiologic Science program events.

(See *Appendix 8K.3.2.1: The Patient Care Partnership, Appendix 8K.3.2.2: Code of Ethics of* Holy Family University Policy Manual: Volume VIIK - Page 9
8K.3.3 Eligibility for Clinical Placement

Eligibility for clinical placement requires that each student meet the following criteria:

Personal health information shall include: preadmission health examination and immunization record and cumulative student health records be maintained throughout the student’s enrollment.

Prior to beginning clinical education experiences and subsequently thereafter, students are required to:

1. Maintain the ethics eligibility requirements of the American Registry of Radiologic Technologists, as well as standards required by clinical agencies where students are assigned.

2. Maintain current cardiopulmonary resuscitation (CPR) competency for health care professionals. Students who do not meet this requirement will not be able to attend clinical education assignments and clinical absences will be calculated into the clinical attendance factor.

3. Complete a criminal background, social security and child abuse check using CertifiedBackground.com (www.certifiedbackground.com). Students will not be validated to enter the first clinical education course unless the criminal background checks are performed with negative results. All must be repeated if enrollment has been discontinued for more than one semester. Students are responsible for notifying the Radiologic Science Program Office immediately following any change in legal status. Conviction of any offense other than a minor traffic violation will result in dismissal from the Radiologic Science Program with no option for readmission.

4. A drug screening is required, completed within three months prior to the program’s start date. Students will not be validated to enter the first clinical education course unless a drug screen is performed with negative results. The sample for screening will be obtained and tested by a certified laboratory approved by the Radiologic Science program.* Medical review and/or retesting of the previously submitted sample will be conducted according to the policy of the approved laboratory.

5. Health packet information (provided by the program) must be completed as directed to avoid delaying the start of clinical education assignments. Student health credentials must also be up to date to begin clinical education assignments.

*Copies of documentation will be forwarded to clinical agencies upon request.

Students are required to:

1. Submit pre-entrance health examination and immunizations to Radiologic Science Program Office required by University and Health Services.

2. Submit results of a yearly PPD to the Radiologic Science Program Office. Students who received a BCG/SSI vaccination or have had a positive PPD will be required to have a chest x-ray every two years or physician clearance prior to clinical experience.
3. Maintain current CPR for Health Care Professionals and submit documentation to the Radiologic Science Program Office prior to beginning clinical education assignments and thereafter as required. [In any healthcare assignment, it is imperative that healthcare providers, at all levels, be proficient in basic life-saving techniques, therefore, Radiologic Science students are required to maintain continuous certification in cardiopulmonary resuscitation (CPR) for healthcare providers throughout their enrollment.]

4. Submit completed criminal background, social security and child abuse checks and drug/alcohol screening to the Radiologic Science Program Office prior to beginning clinical education assignments and thereafter as required.

5. Complete a physical examination and submit the Report of Health Evaluation to the University’s Health Services Office prior to beginning clinical education assignments. The following should be included with the physical examination:
   a. Documentation of two MMR immunizations or titers for measles (rubeola) and German measles (rubella).
   b. Documentation of having had chicken pox, varicella vaccine, or titer for chickenpox.
   c. Documentation of maintenance of a tetanus immunization every 10 years.
   d. Documentation of Hepatitis immunizations or signed waiver.
   e. Document annual negative tuberculosis test, or if positive tuberculosis test in the past, a chest x-ray is required every two years.

6. Submit documentation of personal health care insurance to the Radiologic Science Program Office prior to beginning clinical education assignments and thereafter as required.

7. Annually, provide Radiologic Science Program Office an updated copy of ARRT certification card, specifically indicating compliance with CE credit. Utilizing proper principles of body mechanics is also important to clinical practice in order to avoid back injury.

8K.3.3.1 Health Insurance Policy

Students completing clinical education assignments are required to have continuous healthcare insurance. This is a requirement of all clinical education settings. Neither the clinical education setting nor the University is financially responsible for care provided to a student who becomes ill or injured during clinical education activities. Proof of current health insurance (a copy of healthcare insurance card) must be provided annually.

8K.3.3.2 Clinical Credentials Policy

1. Submit results of an annual negative tuberculosis test to the Radiologic Science Office. If you have had a positive tuberculosis test in the past, a chest x-ray is required every two years.

2. If you have not had chicken pox or the vaccine, you must have a varicella titer and documentation filed with the Radiologic Science Office.

3. If, as an internal transfer student, you already completed the University’s Report of Health Evaluation, you have met this requirement. However, please read #4 below, as dates of
immunizations are required, not a checkmark indicating completion.

4. The Report of Health Evaluation form has a section on immunizations that must be completed as directed. Dates of immunizations are extremely important. If the physician is unable to document the date of your Rubella or the two dates of your Rubeola and “mumps” immunizations, you will need a Rubella titer and/or Rubeola titer that indicates these immunizations are not required. Immunizations must be completed and documented prior to clinical placement.

5. Evidence of a negative criminal background, social security and child abuse checks as reported by www.CertifiedBackground.com and PA child abuse clearance is required. Students must immediately notify the Program Director of any change in legal status.

8K.3.4 Clinical Education Assignment

The Clinical Coordinator determines clinical education assignments. These assignments provide students with the volume and variety of clinical experiences necessary to successfully progress through the BSRS program. Students are expected to assume responsibility for personal transportation to clinical education settings. Students are required to rotate to a minimum of two Clinical Education Settings prior to completing the BSRS program. Assignments to clinical education settings will be based on educationally valid reasons, not proximity to students’ current residence. Clinical assignments for the next semester are posted two weeks prior to the end of the current semester and are considered final.

8K.3.4.1 Clinical Education Settings

A current list of recognized clinical education settings can be found in Appendix 8K.3.4.1.1: Recognized Clinical Education Settings.

8K.3.4.2 General Clinical Education Information

Recognized clinical preceptors are on-site in all clinical education settings. Clinical education assignment hours include the equivalent of 16 hours per week. Clinical assignment for any one day will not exceed 8 hours; however, a student should complete any imaging procedure currently in progress prior to leaving. This includes having images checked for accuracy, decisions on the need for additional images (if necessary) and assurance that the patient is properly dismissed following completion of the imaging procedure.

Student clinical education assignments are developed in accordance with published University semester calendars. Clinical schedules are posted on Blackboard® (per semester) in each clinical education course.

Students are permitted one day (not to be subdivided) of personal time per clinical course without incurring a grade penalty. This day is available for sickness, doctor visits, bereavement, and personal emergency. (See clinical attendance factor policy published in all clinical course syllabi.)

For additional information pertaining to clinical education experiences, students are directed to the BSRS Clinical Education Handbook and individual clinical course syllabi.

8K.3.4.3 Schedule of Clinical Education Assignments

Clinical assignments may follow the summary chart below:
Alternative scheduling may be available on an individual basis. The Clinical Coordinator will determine, and approve, all clinical education schedules.

Clinical education assignment times are published in all clinical education schedules. Note: Paid clinical employment or other activities completed by the student has no influence on the structured clinical experience and is not accepted as a rationale for any change in clinical education requirements.

8K.3.5 Clinical Education Attendance

Students are expected to attend all scheduled clinical assignments. Attendance during all scheduled clinical assignments is necessary to ensure successful completion of clinical course requirements. The Clinical Coordinator keeps a record of each student’s attendance, absence, and lateness for every clinical course. If a student is unable to attend a clinical assignment, (s)he must notify the Radiologic Science Program Office using the “call-out extension” (267-341-3561) and current clinical education setting by 7:45 am on that day (Note: by 3:45 pm if scheduled for 4 pm to 8 pm rotation). Students are encouraged to notify the Program Office and clinical education center the evening before in the event of an anticipated absence (be sure to obtain the name of the person you speak to if voicemail is not available at the clinical site). If a student fails to notify either the program office or clinical education setting of an absence OR notifies either of these settings after 7:45 am (or as noted above), the student is in violation of the attendance policy. (Exceptional circumstances may be reviewed by the Clinical Coordinator on an individual basis.)

Penalties incurred for attendance policy violations are cumulative throughout the two clinical education courses. Violation of the attendance policy results in the following:

1\textsuperscript{st} offense: written warning

2\textsuperscript{nd} offense: student’s clinical grade is lowered one whole letter grade

3\textsuperscript{rd} offense: student’s clinical grade is lowered two whole letter grades

4\textsuperscript{th} offense: dismissal from the Radiologic Science program

Students are permitted one absence per clinical course without grade penalty. Accrual of additional absences in a clinical course may result in clinical failure. Details describing grade calculations for each clinical course are included in individual course syllabi.

Lateness reflects unprofessional and irresponsible behavior. If a student is unable to arrive at a clinical assignment on time, (s)he must follow the Attendance Policy as outlined above. Failure to comply is considered a violation of the Attendance Policy. Three late (or leaving early) occurrences per semester are counted as one absence in the clinical attendance factor. Any student who arrives more than two hours late for a clinical assignment will be considered absent for that day. All lateness (or leaving early) time will be calculated in the clinical attendance factor.
A student who begins a clinical assignment is expected to complete the entire assignment. If a student leaves a clinical assignment early, (s)he must notify a Holy Family Radiologic Science faculty (e.g., Clinical Coordinator, Program Director, or Clinical Instructor) prior to leaving the clinical setting. Leaving a clinical assignment early without notifying Radiologic Science faculty is considered an attendance policy violation. In addition, time missed will be calculated into the student’s clinical attendance factor as absence time.

Clinical preceptors (or others employed by clinical agencies) do not have authorization to dismiss students early from clinical assignments.

Record of student attendance will be kept through www.ontheclock.com. All students will be provided unique user names and passwords to sign-in and out of www.ontheclock.com. Students are to keep their user names/passwords confidential and are not to sign in/out for other students. Signing in/out for other students is considered a violation of the Attendance policy for any/all students involved. Using designated computers at each clinical site, students are responsible for signing-in at the time of their arrival and signing-out prior to leaving for the day. If computer access is not available at an assigned clinical education setting, students must sign-in and out by leaving a message on the “call-out extension” (267-341-3561). (Using personal phones/computers to sign-in/out is a violation of Clinical Education Attendance policy.) Unless the Program Office and clinical setting are notified of the student’s lateness beforehand, any student signing-in after their designated start time will be considered absent for the day.

An early release option from clinical education assignments is not supported.

Violations of the Attendance Policy relating to signing-in/out are outlined on the Attendance Policy Flowchart.*

*The Attendance Policy Flowchart is posted on Blackboard® all clinical education Blackboard® courses.

8K.3.6 Emergency University Closing

Day Classes: School Closing Number 124
Evening Classes: School Closing Number 2124

In the event of inclement weather or other emergencies, University closings will be announced on KYW 1060-AM radio or online at www.kyw1060.com. Students are not expected to attend class or clinic in the event of University closing, but should notify the clinical site by 8 am (or 4 pm) that the University is closed. There is no need to notify the Program Office, as the office will already have this information. (See University Policy Manual Volume II for additional information.) If impending inclement weather causes the Philadelphia campus, Newtown, or Bensalem to close, the opening message on the University telephone system (215-637-7700) will be changed to indicate the closures.

To ensure the security of Holy Family’s three locations, the University has implemented an “emergency alert” system. This voluntary system is designed to immediately notify the campus community, via cell phone or email, when an emergency situation occurs on campus. Up to two cell phone numbers and one email address may be registered per person. In addition to emergency situations, this system will alert registered members when the University is closed due to snow or other weather-related events. To register, visit: www.holyfamily.edu/about-holy-family-u/our-campuses/security-safety/emergency-texting-system.
8K.3.7 Use of Controlled Substances

8K.3.7.1 Alcohol and/or Drugs
Use of (and/or suspected to be under the influence of) alcohol and/or drugs at clinical education settings is prohibited. Such influence/use is also in violation of University student policies and will result in immediate clinical suspension and/or dismissal from the program/University. For further information, please see section 8K.2.4, University Policy Manual Volume II, Section 2.6.2 for Campus Community Policies Community Policies and the University Student Handbook Alcohol and Drug Control Policy.

8K.3.7.2 Smoking at Clinical Education Settings
Clinical education settings are smoke-free environments. Smoking is discouraged and may be permitted only in restricted areas officially designated by each clinical education setting.

8K.3.8 Dress Code
Students are required to present a professional appearance during all scheduled clinical assignments.

It is the patient’s right to be treated with dignity and care by individuals who practice appropriate personal hygiene. Therefore, each student is required to practice appropriate personal hygiene when participating in clinical education assignments.

The dress code for students attending clinical assignments includes:

1. Cleanliness and neatness without offensive odor are required.
2. Solid navy blue scrub pants correctly sized and fitting at waist, and navy blue scrub top, clean, neat, pressed, and unstained. All-white socks. Uniforms will be purchased through the University Bookstore.
3. A plain white turtleneck or crew neck long sleeve (non-thermal type) shirt under scrub top is also acceptable.
4. Clean white uniform shoes, or entirely white sneakers (used only for clinical education purposes).
5. Lab jackets/coats (white only) are recommended if clinical assignment area necessitates additional clothing for warmth.
6. Holy Family student identification patch must be sewn onto the upper left sleeve of each scrub top and lab coat (or jacket).
7. Holy Family issued Radiation Monitor at waist or collar level (collar if lead apron is worn). If a clinical education setting issues a second radiation monitor, students should follow institutional guidelines regarding how to wear the monitor.
8. Simple post earrings (two maximum in earlobe only), wedding ring, and a watch are acceptable. Any exposed body jewelry (including tongue), other than that worn in the ear or on the finger is prohibited.
9. Identification (ID) badges issued by clinical education settings must be visibly displayed. If no clinical agency ID is issued, the student’s Holy Family ID must be visibly displayed.
10. Name tag must be pinned to the upper left side of uniform top (or jacket).
11. Hair must be neat in appearance, worn up or secured off the face and of a natural color. A single solid white, navy, tan or black headband may be worn.

12. Beards should be neat, clean and well groomed, not of extreme length and should not interfere with the performance of clinical education assignments. Mustaches are permitted, otherwise facial hair should be shaven daily.

13. All tattoos* must be sufficiently covered as to not be visible. *See Appendix 8K.2.1.2: Tattoo Policy.

14. Fingernails must be short and neatly trimmed. Artificial nails or nail tips are not permitted. Nail polish, if worn, must be clear or light in color. Hand washing, following contact with each patient is required.

Any student not in uniform as described above will have the violation documented (in writing) and may be sent home and considered absent for that day. Dress code violations are cumulative for the two clinical education courses. Violation of dress code policy results in the following:

- 1st offense: written warning
- 2nd offense: student’s clinical course grade is lowered one whole letter grade
- 3rd offense: student’s clinical course grade is lowered two whole letter grades
- 4th offense: dismissals from the Radiologic Science Program.

In the event of unexpected uniform soiling during the day, a Holy Family faculty (e.g., Clinical Instructor, Clinical Coordinator) will provide guidance.

8K.3.9 Emergency Situations

In case of an emergency situation involving a student, the student must contact the Clinical Coordinator immediately. If the Clinical Coordinator cannot be reached, the Program Office can be reached at 267-341-3360 (between 7 am & 3 pm) or 267-341-3561 (after 3 pm). Course syllabi also provide contact information for the Clinical Coordinator & clinical instructor(s).

8K.3.10 Hospital Visiting Privileges

Students are to follow existing hospital policies when visiting any hospital patient.

8K.3.11 Infectious Diseases

“Standard (Universal) Precautions” are to be practiced at all clinical education settings. All institutional policies regarding isolation and material disposal must be followed.

Students are discouraged from engaging in patient care activities when they themselves have an active and potentially contagious illness. Their responsibility is to protect not only patients on reverse precautions, but also vulnerable individuals, including all patients and staff members.

Regardless of the nature or cause of the patient’s illness, Radiologic Science students may not elect to limit participation in the care of any patient. Students who have questions regarding potentially contagious patient illnesses are advised to contact program faculty or clinical preceptor/supervisor for guidance.

8K.3.12 Malpractice Insurance

Liability insurance through Holy Family University’s insurer is mandatory for all students registered for clinical education courses. The fee ($40 per year) is included in the student’s
tuition and fees associated with clinical education courses. Liability coverage is for scheduled clinical education assignments only. Students who are employed by affiliated clinical education settings or other radiology-related facilities are not covered under this policy as an “employee” (or volunteer).

8K.3.13 Pregnancy Policy

Occupational exposure is unavoidable when participating in the completion of radiographic examinations. Occupational exposure will be monitored on a bimonthly (or monthly) basis and federal laws place limits on the amount of bimonthly (monthly for fetal) occupational exposure an individual can receive. Federal regulations further regulate the amount of “occupational exposure” a pregnant student can receive throughout her pregnancy. Therefore, all educational programs, as well as the profession of Radiologic Sciences, have been required to adopt “pregnancy policies” for female students (and employees). The Pregnancy Policy of the Radiologic Science program of Holy Family University is described below.

A pregnant student has the option to “declare” (see Appendix 8K.3.13.1: Declaration of Pregnancy Form) and “retract” her pregnancy (in writing) (see Appendix 8K.3.13.2: Retracting Pregnancy to the Program Director. The declaration of “pregnancy” will allow a student to receive counseling regarding fetal radiation protection practices. If a student declares her pregnancy, she is required to meet with the Radiologic Science Program’s Radiation Safety Officer (RSO) for counseling on fetal risk factors associated with radiation exposure incurred while she is completing her clinical education (and radiographic exposure laboratory) assignments. Following counseling, she will be issued a second “fetal” radiation monitor. The fetal monitor will be issued and collected monthly during the entire gestational time period and the effective dose equivalent to the fetus, from radiation exposure received during educationally-related activities, shall be monitored to inhibit exceeding a 500 mrem gestational dose. The fetal monitor will be worn at waist level and under lead apparel when lead apparel is required to be worn. When the student is scheduled for clinical education assignments including fluoroscopy and/or mobile radiography, she is required to wear a lead apron containing a minimum lead equivalency of 0.25 mm and wear her fetal monitor under the lead apron. If at any time during gestation, her cumulative fetal monitor exposure value exceeds 500 mrem or a fetal monitor’s monthly exposure value exceeds 50 mrem, she will be prohibited from completing any further educationally related activities until she has given birth.

The “declared” pregnant student will also be required to meet with the Program Director to discuss the didactic and clinical education implications of her pregnancy. She will be informed that her clinical education assignments and activities will not be restricted in an effort to control her fetal exposure level. She will also be informed that her didactic and clinical education responsibilities cannot be waived during her pregnancy. Also, if she declares pregnancy, the Program will notify individuals at her current clinical education setting (and any future setting(s) assigned to during pregnancy) it deems should be informed regarding her pregnancy, in an effort to ensure her safety and the safety of her fetus. She will then elect one of the following two options:

1. Continue her progression through the Program, fulfilling all didactic and clinical education responsibilities as scheduled for the duration of her pregnancy

   OR

2. Completely withdraw from the Program in good standing for the duration of her
pregnancy.† She will have the option to follow the Program’s Readmission Policy after pregnancy. Graduation will take place following fulfillment of all didactic and clinical education course requirements.

†This option will delay her date of graduation, due to the interruption in academic progression.

8K.3.14 Radiation Protection Practices

8K.3.14.1 Protection Practices

It is every student’s personal responsibility to employ radiation hygiene practices whenever and wherever ionizing radiation is being employed. This practice includes employing time, distance (Inverse Square Law), shielding, and beam restriction (collimation) to reduce overall radiation exposure to patients, self and others.

Under no circumstances will a student be allowed to hold a patient during an imaging exposure, as stated in current radiation safety guidelines (NCRP Report No. 105 pp.48). If a patient is in need of support to maintain a specific imaging position, mechanical immobilization should be employed. Only when mechanical immobilization fails should a human be used as a means of patient support/immobilization during a radiographic exposure. In the event that a human is employed for patient support/immobilization, the person should be a non-pregnant relative, guardian, or friend of the patient. Anyone present in an imaging room with a patient during a radiation exposure should be provided with a lead apron and positioned to avoid exposure by the “primary” radiation beam.

Penalties incurred for protection practice policy violations are cumulative for the two clinical education courses. Violation of protection practice policy results in the following:

1st offense: written warning
2nd offense: student’s clinical course grade is lowered one whole letter grade
3rd offense: student’s clinical course grade is lowered two whole letter grades
4th offense: dismissal from the Radiologic Science program

8K.3.14.2 Patient Protection

Protection of the patient is the student’s responsibility when performing all imaging procedures. Students must be aware of and enforce the policies and procedures pertaining to beam limitation (collimation) and patient shielding at each clinical education setting.

In support of appropriate patient radiation protection practices, it is imperative that the correct patient and/or body part be examined. To this end, if any patient (or body part) is wrongfully exposed, the following steps must be followed:

1. Report occurrence immediately to an assigned technologist and supervisor;
2. Fill out an Incident Report at the clinical education setting, describing the accident or injury;
3. Notify the Radiologic Science Program Office on the day of this event; and
4. Meet with the Clinical Coordinator as soon as possible for conferencing.

Additionally, this situation is treated as a severe violation of the patient protection policy, resulting in the following:

1st offense: student’s clinical grade is lowered one whole letter grade
2nd offense: student’s clinical grade is lowered two whole letter grades
3rd offense: **dismissal** from the Radiologic Science program

Penalties incurred for patient protection policy violations are cumulative for the two clinical education courses.

**8K.3.14.3 Supervision of Students – Direct/Indirect**

**Direct Supervision**-
Occurs when a student is directly observed by a supervising technologist while performing an imaging procedure. Direct observation of the student MUST occur both in the imaging room and at the operator’s control panel.

Direct student supervision is required with **no exceptions**:

- whenever the student is *repeating* an unsuccessful imaging procedure;
- if the student has *not* previously demonstrated to be competent performing this examination procedure.

**Indirect Supervision**-
Occurs when the student performing an imaging procedure has a supervising technologist within “normal voice call” distance away from the imaging room where the imaging procedure is being performed.

Indirect supervision of a student may be practiced with **no exceptions**:

- when a student is performing a clinical examination procedure that (s)he has *previously* demonstrated to be competent to perform.

**8K.3.14.3.1 Repeating Imaging Procedures**

Due to many influencing factors, repeating a patient’s imaging procedure has the potential to compromise the safety and welfare of that patient, the student and other health care workers. Therefore, it is this program’s policy that any student repeating any part of an imaging procedure for any reason, must perform the repeat(s) under the Direct Supervision of a registered technologist/preceptor/faculty, **with no exceptions**.

**8K.3.14.4 Personal Radiation Monitoring and Report**

It is the student’s personal responsibility to employ sensible radiation hygiene practices whenever and wherever ionizing radiation is being employed. This practice includes employing **time**, **distance** (Inverse Square Law), **shielding** and **beam restriction** (collimation) to reduce overall radiation exposure to patients, self, and others. Leaded apparel **shall** be worn when performing all mobile/portable radiographic/fluoroscopic procedures.

**Personal Radiation Monitoring Policy**

A radiation monitor (Luxel®) will be issued to each student and **must** be worn at all times during clinical education and RADS laboratory assignments. The monitor is to be worn either at the collar or at waist level when no lead (Pb) shielding is worn and at the collar level (outside the lead apron) when lead (Pb) shielding is worn.

A lost or damaged Luxel® monitor **must** be reported to the Program Office **immediately**. The student must write a brief letter, addressed to the Holy Family University Radiologic Science Program’s Radiation Safety Officer (RSO) stating when the monitor was lost or damaged. The
Program will order a replacement Luxel® monitor for the student. The student is responsible for all costs associated with replacing a monitor. The student will not be permitted to resume clinical education and/or laboratory assignments until a replacement monitor is obtained. Any clinical education time missed due to loss of or damage to a Luxel® monitor will be considered as absence time and deducted from the student’s permitted absent time. The Clinical Attendance Factor will also reflect any missed time due to radiation monitor policy violation. Students are referred to didactic course syllabi to determine how laboratory absences may impact those course grades.

Luxel® monitors will be exchanged for new monitors in the Radiologic Science Office (HFH room 114) every other month. Notification for radiation monitors to be exchanged will be announced on Blackboard® in clinical education courses and students will also receive an email notification from the Program. Any monitor exchanged late will be considered a violation of the Personal Radiation Monitoring Policy. A $5 co-pay will be charged to ship a late monitor back to Landauer. Loss of (or damage to) a Luxel® monitor will require the student to pay $35 co-pay to replace the monitor. Penalties incurred for the loss of or damage to a Luxel® monitor violates the Program’s Radiation Monitoring Policy. Policy violations are cumulative throughout the five clinical education courses. Violation of the Radiation Monitoring Policy results in the following:

1st offense: written warning
2nd offense: student’s clinical grade is lowered one whole letter grade
3rd offense: student’s clinical grade is lowered two whole letter grades
4th offense: dismissal from the Radiologic Science Program

Any student violating the Personal Radiation Monitoring Policy is required to meet with the RSO to develop a plan of action to ensure this policy in not violated in the future.

Radiation monitor reports are reviewed and maintained by the Program. Each student is required to initial a copy of the current radiation monitor report, indicating (s)he has reviewed the report of his or her radiation exposure incurred during the past two months. The RSO will notify the student in the event that her/his radiation monitor reading exceeds 50 mrem. The RSO will investigate with the student to determine how (and why) her/his radiation exposure exceeded 50 mrem. A plan of action will then be developed and presented to the student (a copy to be placed in the student’s RADS file) to ensure the student’s radiation monitor exposure for a bimonthly time period does not exceed 50 mrem in the future.

8K.3.14.5 MR Safety Information

There are potential risks in the MR environment, not only for the patient but also for the accompanying family members, attending health care professionals and others who find themselves only occasionally or rarely in the magnetic fields of MR scanners, such as security or housekeeping personnel, firefighters, police, etc. There have been reports in the medical literature and print media detailing magnetic resonance imaging (MRI) adverse incidents involving patients, equipment, and personnel. To this end all students enrolled in the MR concentration should obtain a copy of (and thoroughly read) the ACR MR Guidelines Document for Safe MR Practices: 2015, available from the American College of Radiology’s website. http://www.acr.org/Quality-Safety/Radiology-Safety/MR-Safety.

Students enrolled in the MR concentration should also complete the forms found in Appendix 8K.2.1.2: Tattoo Policy and Appendix 8K.2.1.3: Magnetic Resonance Clearance Form and
submit to the Clinical Coordinator.

8K.3.15 Injury/Illness at Clinical Education Settings

1. Students must provide documentation of current (and continuous) health insurance coverage. Any changes in coverage must be reported immediately to the Radiologic Science Program Office.

2. If a student is injured or becomes ill at a clinical education setting the student must:
   a. Report immediately to the supervisor or go directly to the Emergency Room if necessary;
   b. Notify Holy Family University Radiologic Science Program Office as soon as possible; and
   c. Fill out an Incident Report at the clinical education setting, describing the accident or injury;
   d. Report to the supervisor concerning the outcome of the Emergency Room visit;
   e. Present a note to the Program Office from the Emergency Room physician (or family physician) stating when the student may resume normal clinical activities.

The student, or student’s healthcare insurance provider, will be billed for any medical treatment received in the clinical education setting as a result of accident/injury/illness.

3. If a patient under a student’s care, is injured in any way, the following steps must be followed:
   a. Report occurrence immediately to a supervisor and/or supervising preceptor/technologist;
   b. Fill out an Incident Report at the clinical education setting, describing the accident or injury; and
   c. Notify the Radiologic Science Program Office on the day of the event.

Students sustaining injuries/illnesses outside clinical education assignments that compromise completion of clinical education activities and/or jeopardize safe patient care must schedule a meeting with the Clinical Coordinator prior to attending any further clinical assignments. The Clinical Coordinator will determine if/when a student is permitted to resume clinical education activities. A note (or other documentation) provided by the student’s physician approving the student’s return to unrestricted clinical activities is necessary.

8K.3.16 Exposure to Infectious Disease at the Clinical Education Setting

During clinical education, students may be exposed to infectious diseases prior to the institution’s awareness that an infectious disease situation exists in a patient, employee, or visitor.

The student will be treated according to the clinical education setting’s infection control policy. To determine if clinical attendance should be interrupted, the Clinical Coordinator will discuss the student’s situation with the clinical education setting’s office of infection control. Following contraction of an infectious disease, the student must be cleared (in writing) by her/his family physician and/or the clinical education setting to resume clinical education assignments following contraction of an infectious disease. Clinical absences incurred as a result of exposure to an infectious disease occurring during completion of clinical assignments will be reviewed on an individual basis.
8K.3.16.1 Hepatitis B

It is strongly recommended that students complete the Hepatitis B immunization series prior to beginning clinical education. Those students who elect not to be immunized against Hepatitis B will be required to sign a waiver form.

8K.3.16.2 Tuberculosis

It is the student’s responsibility to have tuberculosis screening (i.e., PPD or chest x-ray) completed and documented by the student’s family physician prior to entering the fall semester. Documentation of additional PPD tests must be provided to the Radiologic Science Program Office annually. Students are not permitted to attend clinical education assignments if tuberculosis screening is incomplete and/or documentation has not been provided to the Radiologic Science Program Office.

8K.3.17 Electronic Communication Devices

Policies regarding electronic communication devices in the classroom are addressed in individual course syllabi.

Students are not permitted to carry or use electronic communication devices during clinical assignments. The device must be turned off (or placed on mute) and left in a remote location away from patient care areas (e.g., car or locker). Students are not permitted to make, or receive personal calls while completing clinical education assignments except in cases of emergency. Students are permitted to use personal electronic communication devices during lunch.

Penalties incurred for electronic communication devices policy violations are cumulative for the two clinical education courses. Violation of protection practice policy results in the following:

1st offense: written warning
2nd offense: student’s clinical course grade is lowered one whole letter grade
3rd offense: student’s clinical course grade is lowered two whole letter grades
4th offense: dismissal from the Radiologic Science program

8K.3.18 Policy on Employee vs. Student Status

Students’ clinical education must be kept separate from employment responsibilities. Students’ clinical education assignments will not be made around the student’s work schedule. The University and its faculty are not liable for any incident that occurs during the course of a student’s employment. Clinical examination procedures may only be performed during program-scheduled clinical education assignments. The Clinical Coordinator may choose to assign a student to a clinical education setting that does not currently employ the student. The University’s liability insurance only covers students during program-scheduled clinical education activities. Therefore, it is the responsibility of the student to investigate the availability of liability insurance during the course of employment. Any insignia or badge that represents Holy Family University may not be worn during student employment. A University issued radiation monitor may not be worn during the course of a student’s employment.

Failure to abide by the above policies may result in dismissal from the BSRS program (see 8K.2.4.2).
8K.4 Withdrawal Policies

8K.4.1 Course Withdrawal
The student must schedule a meeting with their assigned academic advisor to withdraw from any academic course.

8K.4.2 Program Withdrawal
The Program Director must be informed, in writing, of intent to withdraw from the BSRS program and/or from the University.
A withdrawal interview is to be scheduled with the Program Director.
The program-issued radiation monitor must be returned to the Program Office.
Formal withdrawal from all courses must be completed with the University’s Academic Advising Center and/or Registrar’s Office in accordance with University policy.

8K.4.3 Leave of Absence
Students who elect to leave the University for more than one semester may be subject to policy (and core curriculum) changes upon readmission and should consult with the Academic Advising Office regarding potential impact to individual degree plans.
8K.5 Holy Family University Radiologic Science Program
Acknowledgement of Receipt

HOLY FAMILY UNIVERSITY
RADIOLOGIC SCIENCE PROGRAM

Acknowledgement of Receipt:

POLICY MANUAL VOLUME VIII-K
BSRS STUDENT HANDBOOK RADIOLOGIC SCIENCE

I have received, thoroughly read, and understand the POLICY MANUAL VOLUME VIII-K STUDENT HANDBOOK RADIOLOGIC SCIENCE for students enrolled in Holy Family University’s Radiologic Science program. I understand the policies and procedures contained therein, including my responsibilities and requirements as a student in said program.

I understand that my failure to comply with the established policies and policies set forth in the POLICY MANUAL VOLUME VIII-K STUDENT HANDBOOK RADIOLOGIC SCIENCE may result in my suspension or dismissal (academic and/or non-academic) from said program.

I agree to comply with all policies and procedures as written and agree to immediately discuss any questions or concerns with the Radiologic Science Program Director.

Name: ________________________  Date: ____________

Please print this page, sign it, and submit to the Radiologic Science program Office.
Appendix 8K.2.1.1: Technical Standards

In addition to the academic standards, the following technical standards are required for admission to the radiography curriculum.

**TECHNICAL STANDARDS FREQUENCY**

<table>
<thead>
<tr>
<th>Activity</th>
<th>Description</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>STOOP</td>
<td>To lift imaging cassettes; to help sit a patient up in bed.</td>
<td>F</td>
</tr>
<tr>
<td>KNEEL</td>
<td>To perform CPR; to assist a patient lying on the floor who may have fainted.</td>
<td>O</td>
</tr>
<tr>
<td>CROUCH</td>
<td>To place radiographic imaging cassettes under a patient in an operating room setting.</td>
<td>O</td>
</tr>
<tr>
<td>REACH</td>
<td>Extend to at least 6 feet from floor to an overhead x-ray tube suspended from the ceiling.</td>
<td>O</td>
</tr>
<tr>
<td>GRASP</td>
<td>Equipment such as overhead x-ray tubes, portable x-ray machines, c-arm units, control panel knobs, patient extremities.</td>
<td>F</td>
</tr>
<tr>
<td>PUSH</td>
<td>To perform CPR; equipment such as overhead x-ray tubes, portable machines, c-arm units; patient stretchers and wheelchairs.</td>
<td>O/F</td>
</tr>
<tr>
<td>PULL</td>
<td>To move a patient from bed to stretcher and/or stretcher to radiographic table.</td>
<td>F</td>
</tr>
<tr>
<td>LIFT</td>
<td>To help move a patient from wheelchair to radiographic table; to pick up radiographic film cassettes.</td>
<td>F/C</td>
</tr>
<tr>
<td>STAND</td>
<td>To provide patient care and/or observation for a sustained period of time.</td>
<td>F</td>
</tr>
<tr>
<td>WALK</td>
<td>To complete a clinical education (or work) assignment for the duration of 8 hours.</td>
<td>C</td>
</tr>
<tr>
<td>CLIMB</td>
<td>Using stairs to reach patient care areas throughout a multilevel hospital.</td>
<td>F</td>
</tr>
<tr>
<td>BALANCE</td>
<td>To transfer a patient from wheelchair to radiographic table and back.</td>
<td>F</td>
</tr>
<tr>
<td>HEAR</td>
<td>Blood pressure sounds through a stethoscope; verbal communication from patients, physicians, radiographers, and other healthcare providers.</td>
<td>O/C</td>
</tr>
<tr>
<td>TALK</td>
<td>Speak to patients, physicians, radiographers, and other healthcare providers.</td>
<td>C</td>
</tr>
</tbody>
</table>

*Frequency Key:*

**O** = occasionally (1 - 25%); **F** = frequently (25 - 75%); **C** = constantly (75 - 100%)
TECHNICAL ACTIVITIES DEFINED

CLIMBING: Ascending or descending using feet, legs, hands, and arms. Body agility is emphasized.

BALANCING: Maintaining body equilibrium to prevent falling when walking, standing or crouching.

STOOPING: Bending body downward and forward by bending legs and spine.

KNEELING: Bending legs at knee to come to a rest on knee or knees.

CROUCHING: Bending the body downward and forward by bending legs and spine.

REACHING: Extending hand(s) and arm(s) in any direction.

STANDING: Maintaining an erect (or upright) position on both feet, particularly for sustained periods of time.

WALKING: Moving about on foot to accomplish tasks, particularly for long distances (or times).

PUSHING: Using upper extremities and legs to press against something with steady force in order to thrust forward, downward or outward.

PULLING: Using upper extremities and legs to exert a force on an object toward the mover.

LIFTING: Raising objects from a lower to a higher position or moving objects horizontally from one position to another.

GRASPING: Applying firm pressure to an object with the fingers and palm.

TALKING: Expressing or exchanging ideas by means of the spoken word to other healthcare workers accurately, loudly, and efficiently.

HEARING: Ability to receive detailed information through oral communication and to make fine discriminations in sound (i.e., obtaining a blood pressure) when applicable.

VISUAL ACUITY: This is a minimum standard for use with those whose work deals largely with preparing and analyzing data and figures, accounting, transcription, computer terminal, monitors, extensive reading, visual inspection, using measurement devices, assembly or fabrication of parts at distances close to eye.

MEDIUM WORK: Exerting up to 50 lb. of force occasionally, and/or up to 20 lb. of force frequently, and/or up to 10 lb. of force constantly to move objects.
Appendix 8K.2.1.2: Tattoo Policy

HOLY FAMILY UNIVERSITY
RADIOLOGIC SCIENCE PROGRAM
BACHELOR OF SCIENCE IN RADIOLOGIC

Magnetic Resonance Track

Dear Applicant:

During completion of your application for admission to Holy Family University’s Bachelor of Science in Radiologic Science degree program’s (or Post-Primary Certification) Magnetic Resonance (MR) track, you declared having a tattoo on the Appendix 8K.2.1.3: Magnetic Resonance Clearance Form. Certain types of tattoo materials contain metal. Be advised, MR units utilize moving magnetic fields that create electromagnetic induction (electrical current) in conductive materials (e.g., metal in tattoo ink) that may lead to skin irritation and/or injury in the area of the tattoo(s). No methods are available to pretest your tattoo, and therefore, of ensuring your safety while completing MR clinical rotations.

For more information, applicants are advised to visit the American College of Radiology website on MR Safety:

I assume all responsibility for any injuries incurred as a result of tattoo-related skin irritation and/or injury incurred while completing MR clinical education activities as assigned by Holy Family University’s Radiologic Science program.

Appendix 8K.2.4.2.1: Clinical Conduct Policy

HOLY FAMILY UNIVERSITY
SCHOOL OF NURSING & ALLIED HEALTH PROFESSIONS
CLINICAL CONDUCT POLICY

At the core of Nursing and Allied Health Professions are professional and ethical standards including the ANA Code of Ethics for Nurses, ASRT Code of Ethics, and ARRT Standards of Ethics that outline appropriate professional conduct. Professional and ethical standards define the core of professional conduct so vital to clinical success – promoting the protection, safety, and comfort of the general public. Nursing and Allied Health Professions students should be committed to learning and accepting the ethical standards of conduct of their respective professions.

The objective of the Clinical Conduct Policy is to ensure optimum patient care during the completion of clinical assignments by promoting a safe, cooperative, and professional healthcare environment, and to prevent or eliminate (to the extent possible) conduct that:

- disrupts and/or obstructs routine operation of the clinical education setting;
- affects the ability of others to perform job responsibilities competently;
- creates an unfriendly clinical environment for clinical education setting’s employees, program faculty, and/or other students; and
- adversely affects or impacts community confidence in the clinical education setting’s ability to provide quality patient care.

Below is a partial list of improper professional conduct that will result in a student’s removal from a clinical education setting, failure of the course, and/or dismissal from the program.

1. Dishonesty, falsification, misrepresentation, or providing misleading or incorrect information in connection with any university, hospital or agency requirement and record.
2. Stealing or sabotaging of equipment, tools or supplies belonging to a faculty, patient, visitor, or employee.
3. Damage, abuse or destruction of hospital or agency property.
4. Possession, sale or use of intoxicating beverages or drugs on hospital or agency property.
5. Unauthorized use, possession, conveyance or storage of any firearms, explosive or other dangerous weapons on hospital or agency premises.
6. The use of profane, threatening or inappropriate language toward faculty, employees, patients or visitors or other students.
7. Fighting, bodily injury, unsafe negligent behavior, directed toward faculty, employees, patients, visitors or other students.
8. Disclosure of confidential patient, clinical agency, or program information.
9. Deliberately gaining unauthorized access to restricted information.
10. Unauthorized entry into or use of clinical agency facilities.
11. Display of unprofessional demeanor when responding to constructive feedback; verbally hostile, abusive, dismissive or inappropriately angry.
12. Violation of the University’s (or clinical agency’s) sexual harassment policy.
13. Violation of the University’s (or clinical agency’s) HIPAA policy.

A student’s action(s) may be reviewed for continuation in the program if he or she has displayed a lack of professionalism with respect to patients, clinical agency and staff, faculty, students or any member of the public. The program reserves the right to dismiss a student when actions/behavior does not justify continuation in the program.
Appendix 8K.3.2.1: The Patient Care Partnership

These rights can be exercised on the patient’s behalf by a designated surrogate or proxy decision maker if the patient lacks decision-making capacity is legally incompetent, or is a minor.

What to expect during your hospital stay:

- High quality hospital care.
- A clean and safe environment.
- Involvement in your care.
- Protection of your privacy.
- Help when leaving the hospital.
- Help with your billing claims.
CONCLUSION:

Hospitals have many functions to perform, including the enhancement of health status, health promotion, and the prevention and treatment of injury and disease; the immediate and ongoing care and rehabilitation of patients; the education of health professionals, patients and the community; and research. All these activities must be conducted with an overriding concern for the values and dignity of patients.

Appendix 8K.3.2.2: Code of Ethics of the American Society of Radiologic Technologists

1. The radiologic technologists conduct themselves in a professional manner, respond to patient needs and support colleagues and associates in providing quality patient care.

2. The radiologic technologist acts to advance the principal objective of the profession to provide services to humanity with full respect for the dignity of mankind.

3. The radiologic technologist delivers patient care and service unrestricted by concerns of personal attributes or the nature of the disease or illness, and without discrimination on the basis of sex, race, creed, religion or socioeconomic status.

4. The radiologic technologist practices technology founded upon theoretical knowledge and concepts uses equipment and accessories consistent with the purpose for which they were designed and employs procedures and techniques appropriately.

5. The radiologic technologist assesses situations; exercises care, discretion and judgment; assumes responsibility for professional decisions; and acts in the best interest of the patient.

6. The radiologic technologist acts as an agent through observation and communication to obtain pertinent information for the physician to aid in the diagnosis and treatment of the patient; and recognizes that interpretation and diagnosis are outside the scope of practice for the profession.

7. The radiologic technologist uses equipment and accessories, employs techniques and procedures, performs services in accordance with an accepted standard of practice and demonstrates expertise in minimizing radiation exposure to the patient, self and other members of the health care team.

8. The radiologic technologist practices ethical conduct appropriate to the profession and protects the patient’s right to quality radiologic technology care.

9. The radiologic technologist respects confidence entrusted in the course of professional practice respects the patient’s right to privacy and reveals confidential information only as required by law or to protect the welfare of the individual or the community.

10. The radiologic technologist continually strives to improve knowledge and skills by participating in continuing education and professional activities, sharing knowledge with colleagues and investigating new aspects of professional practice.
Appendix 8K.3.2.3: Eligibility for Certification by the American Registry of Radiologic Technologists

Our pledge to promote high standards of patient care includes enforcing high standards of ethics among Registered Technologists – and among candidates for examination. All candidates must comply with the Rules of Ethics contained in the ARRT Standards of Ethics.

The Rules of Ethics are standards of minimally acceptable professional conduct for all Registered technologists and applicants. The Rules of Ethics are intended to promote the protection, safety and comfort of patients. Registered Technologists and candidates engaging in any of the conduct or activities noted in the Rules of Ethics, or who permit the occurrence of such conduct or activities, have violated the Rules of Ethics and are subject to sanctions.

One issue addressed by the Rules of Ethics is the conviction of a crime – which includes felony, gross misdemeanor or misdemeanor, with the sole exceptions of speeding and parking violations. All alcohol and/or drug related are included. “Conviction,” as used in this provision includes a criminal proceeding where a finding or verdict of guilt is made or returned but the adjudication of guilt is either withheld or not entered, or a criminal proceeding where the individual enters a plea of guilty or nolo contendere.

The Application for Primary Examination asks: “Have you ever been convicted of a felony or misdemeanor?” If your answer is “No” you move on to the next question. Anyone who answers “Yes” is asked to provide a detailed explanation and official court documentation of the charges. Court documentation must verify the nature of the conviction, the sentence imposed by the courts, and the current status of the sentence. If a candidate’s status changes due to a conviction after applying but before taking the exam, the candidate must inform ARRT immediately.

Rules of Ethics also address military court-martials that involve substance abuse, sex-related infractions or patient-related infractions. Candidates with court-martials must provide a detailed personal explanation, documentation verifying the reasons for the court-martial, the conditions of the sentence and the status of the sentence.

Pre-Application Review

If a candidate is concerned about whether his or her conviction record will affect exam eligibility, there is a way to find out in advance.

ARRT investigates all potential violations in order to determine eligibility, and such investigations can cause delays in processing exam applications. Candidates can avoid delay by requesting a pre-application review of the violation before or during training, rather than waiting until completing the educational program. ARRT will rule on the impact of the violation on eligibility for ARRT examination. Once eligibility is established, the candidate proceeds with application.

The pre-application review form is downloadable from the ‘Ethics” section of our www.arrt.org web site, or you may request a copy by phoning ARRT at 651-687-0048, ext. 544.

“The ARRT Exam Eligibility Requirements are reprinted by permission of the ARRT. The ARRT Exam Eligibility Requirements and all parts thereof are Copyrighted by the ARRT.”

- It is the student’s responsibility to secure transportation to and from clinical education settings.

- Radiologic Science faculty determine students’ clinical education assignments. Clinical assignments are not made to correspond to students’ geographic locations.

- All students rotate to a minimum of two clinical education settings.

- Students’ clinical assignments routinely change after one semester.

- Standard clinical rotations include: MW or TTH 8 am – 4 pm, MW 4 – 8 pm & F 8 am – 4 pm or M-TH 4 – 8 pm.

**Clinical education settings may be added or deleted as necessary.**
Appendix 8K.3.13.1: Declaration of Pregnancy Form

FORM LETTER FOR DECLARING PREGNANCY

This form letter is provided for your convenience. To make your written declaration of pregnancy, you may fill in the blanks in this form letter or you may write your own letter.

DECLARATION OF PREGNANCY

To: _____________________

In accordance with the NRC's regulations at 10 CFR 20.1208, "Dose to an Embryo/Fetus," I am declaring that I am pregnant. I believe I became pregnant in_____________ (only month and year need be provided).

I understand the radiation dose to my fetal monitor (embryo/fetus) during my entire pregnancy will not be permitted to exceed 500 mrem (5 millisievert) (unless that dose has already been exceeded between the time of conception and submitting this letter) or a single monthly exposure value exceeds 50 mrem (0.5 millisievert), I will be prohibited from completing any further clinical education assignments and/or participating in RADS course laboratories that require radiation exposures to be made until I have given birth. I understand that my clinical education assignments and activities will not be restricted in an effort to control my fetal exposure level. I understand that individuals in my clinical education setting (and any future setting(s) I may be assigned to during my pregnancy) will be notified regarding my pregnancy, in an effort to ensure my safety and the safety of my fetus. I also understand that my didactic and clinical education responsibilities will not be waived during my pregnancy.

Appendix 8K.3.13.2: Retracting Pregnancy

FORM LETTER FOR RETRACTING PREGNANCY

This form letter is provided for your convenience. To make your written retraction of pregnancy, you may fill in the blanks in this form letter or you may write your own letter.

RETRACTION OF PREGNANCY

To: ________________________________

In a previous letter dated _________________ I made a declaration of my pregnancy. I now request on this day _________________ to retract my declaration of pregnancy.

I understand that I forfeit the opportunity to continue using a fetal monitor. I understand that my clinical education assignments and activities will not be restricted in an effort to control my fetal exposure level. I also understand that my didactic and clinical education responsibilities will not be waived during my pregnancy.
