

Associate of Science in Radiologic Science

School of Nursing and Allied Health Professions

The Associate of Science in Radiologic Science (ASRS) Degree Program is a 20-month allied health curriculum designed to prepare the student for practice in the health specialty of radiography and lays the foundation for future study in our Bachelor of Science in Radiologic Science (BSRS) Degree Program.

What Can You Do With This Major?

Radiographers operate x-ray equipment to create images of tissues, bones, organs, and blood vessels within the human body. The images created by the radiographer are then interpreted and a diagnosis is made by a radiologist, a physician who specializes in interpreting and diagnosing radiographic images.

Our graduates have high success rates passing the American Registry of Radiologic Technologists (ARRT) Examination in Radiography. With the ASRS degree and certification by the ARRT, our graduates can work in many health care settings throughout the entire United States as certified radiographers. Qualified radiographers are needed in hospitals, clinics, physicians' offices, public-health facilities, mobile x-ray companies, and industry.

Major Coursework

As a Radiologic Science major, your education will be broadened and enriched by our University's liberal-arts tradition. You'll follow a core curriculum of philosophy, religious studies, humanities, and social and natural sciences, and you'll learn about patient care from a spiritual, ethical, and moral perspective. In addition to patient care issues, you'll study human anatomy and physiology, biology, physics, and other behavioral sciences. Specialized courses in radiography include:

- Patient Care in Radiologic Science
- Radiographic Procedures I, II, and III
- Radiographic Imaging I and II
- Image Evaluation: Radiographs
- Introduction to Computed Tomography
- Advanced Imaging I
- Imaging Physics I: X-ray Physics
- Radiographic Pathology
- Radiation Health Physics

Program Options

Associate of Science in Radiologic Science Degree

Bachelor of Science in Radiologic Science Degree (for ARRT-certified radiographers only)

- General Track
- Mammography Track
- Computed Tomography Track
- Magnetic Resonance Imaging Track
- Vascular Interventional Track

Real-World Experience

Clinical courses, begin in the first semester, complement classroom learning and help students prepare for entry-level practice. Your clinical experience will include rotations in community hospitals, medical centers, and other health care facilities, allowing you to develop clinical skills in a wide variety of health care settings that meet the needs of diverse populations.

Facilities

In addition to classroom instruction, you'll benefit from our on-campus energized x-ray lab (including a state-of-the-art computed radiography system).
